

Tatu Sinisalo

Actor

Hello there! Tatu wants to live in a world where love letters are long, emails are short, acting is reacting and script writing is inspired by current political issues such as climate change. World needs more comedy and when there's drama there's an opening to laugh about it and self-heal. Tatu is driven to work with people as being in contact with another person and sharing stories are my profession. I will help you to make your words on paper come to life.

- <http://urn.fi/URN:NBN:fi:tuni-201904261551>
- "In this master theses I present my research on how documentary references can inspire acting in biographical films. 'Documentary acting' is an acting technique I have created. The technique is based on an artistic research about the documentation of the actual events and people relevant to the story and actor's role. Biopic films raise ethical questions about artistic freedom and reliability of art and film industry."
